

Winter Wildlife Detectives

On a cold, sunny day in early March, fourth graders from Medford Elementary School explored Southaven Park in Yaphank for signs of winter wildlife. Animals that were spotted by our exploration detectives included geese, swans, ducks, dogs, fish, raccoons, and seagulls. Signs of animal life included feathers, footprints, skulls, nests and scat. Don't know what scat is? Ask any of our fourth grade students and they'll tell you!
